

STABILIGRID™

Next-Generation Golf Course Maintenance Technology

Supporting the Earth

... rain-proof, mud-free grass pedestrian and vehicular traffic surfaces.

Premier grass turf protection & stabilization system from Europe, the original German-engineered **STABILIGRID™**

Advantages:

- » Permanent sedimentation and runoff prevention.
- » Supports healthy, verdant grass growth.
- » Prevents soil or surface migration.
- » Prevents compaction, or damage to root zones, due to pedestrian or vehicular traffic.
- » Lightweight, flexible + durable = low impact design.
- » Fracture-resistant, high tensile strength.
- » Stable from -58° to + 194° F || 100% Recycled Content.
- » German-engineered to support public roadway traffic.

Compressive Strength: * **385 to 132 tons / m²**
 Vehicular LOAD: **22.45 tons / vehicle axle**
 Porosity: * **82% to 90 %** [*depending upon grade]
 Patented Horizontal Connectors: **5.6 kilonewtons / m**
 Max. Shearing LOAD: **1,400 newtons / meter**
 [approximately **987.5 pounds / foot**]
