... no more mud **Ever!**

Our product

ProEquus OT40 / WE40 Mat Systems for perfect conditions

anti-slip surface

- advantage:**
- perfect traction on safe ground
 - little or even *no ground preparation required
 - reduced footing depth required
 - less maintenance needed
 - optimal stability

Quick and easy installation

- advantage:**
- self installation is not a problem
(a *small crew can install 800 m² in approx. 3 hours)
 - Mats remain securely in place
 - SAVE MONEY!

prevents compaction

- advantage:**
- optimum drainage
 - no more muddy conditions
 - Mats remain in place - do not slide

surface remains elastic

- advantage:**
- treats the tendons and joints with care
 - helps reduce the risk of injury
 - no more uncontrolled slipping

Mats provide drainage without sediments

- advantage:**
- prevents the mixing of footing material and sub base

made from elastic PVC (PolyVinyl Chloride)

- advantage:**
- driveable with heavy vehicles, UV resistant
 - Model OT40 - unconnected
 - Model WE40 - tongue and groove connection

applications

- advantage:**
- outdoor- and indoor- riding arenas
 - paddocks, turn-outs
 - hotwalkers, round pens
 - race track, training tracks, ...

Delivery: Mats 4 cm height
